

# *Garden Spa*

*Experience the luxury and relaxation  
of the new Garden Spa. It's the  
perfect way to unwind after a hard day and  
great fun for all the family.*

## Features

- Seats four adults
- Four powerful turbo directional massage jets
- Jets have individual air and water control
- 300 lt/min pump has built in thermostatically controlled water heater (range 24°C – 40°C) to maintain temperature on-demand heat cycle
- Deluxe model has heated super blower which injects warm air bubbles through 77 massage air jets
- Whisper-quiet pump aids relaxation and ensures neighbours won't be disturbed
- Incorporates automatic filtration cycle to maintain water quality
- Ideal for installation outdoors or in your summer house or conservatory
- Plugs into a standard 13amp socket (must be used with an RCB)
- Our liners come in a choice of three styles with two year warranty - Sahara Sand, Sky Blue and Blue Topaz.
- Capacity 1000 litres
- Weight unfilled 180kg / Weight filled 1180kg
- Two year warranty
- CE approved
- High flow rate delivers optimum massaging relaxation and therapeutic benefit
- Heat retention cover included for when spa is not occupied
- Pressure treated log cabin style walls easily slot together to form super strong structure
- Resin wood, maintenance free top deck finishes off the spa in style
- 'Skim filter' filtration removes oils and debris from surface water

# The Garden Spa

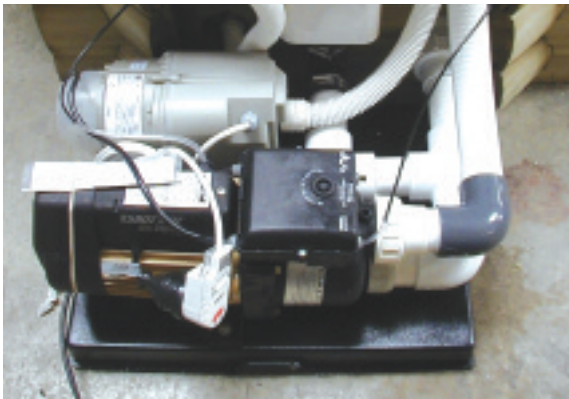

Experience the luxury and relaxation of the new Garden Spa. It's the perfect way to unwind after a hard day and great fun for the family. This attractive spa boasts features that no other spas in this price range can match.

The Garden Spa can be used all year round with its built-in (thermostatically controlled) heater. The water temperature can be set for your comfort between 24°C – 40°C. Cool and refreshing in the summer; warm and relaxing in the winter.

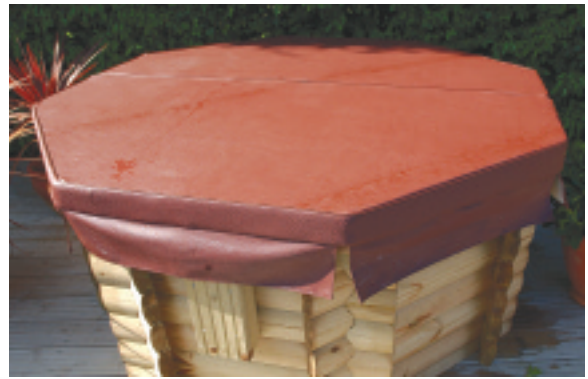

Each spa has four turbo venturi (directional) water/air jets. The power, bubbles and direction of jets are all fully controllable.

The deluxe model includes a unique heated air blower which injects warm bubbles around your back to add to the relaxing experience of the Garden Spa. Other spas systems draw in cold air which causes the water temperature to drop, increasing running costs (as the water has to be reheated) and reducing your relaxation time.

Each spa has a skim-filter filtration system (again a common feature of much more expensive spa systems), which we believe is exclusive to the Garden Spa in the DIY sector. The skim-filter works while the pump is on filtration cycle, drawing in the top layer of water from the spa. This enables the filter to remove any floating debris, leaves, grass and bugs etc which collect in a removable basket. The 10 sqft filtration cartridge (replaceable) cleans away any body oils etc (which float to the top of the water) keeping your spa crystal clear and safe at all times.

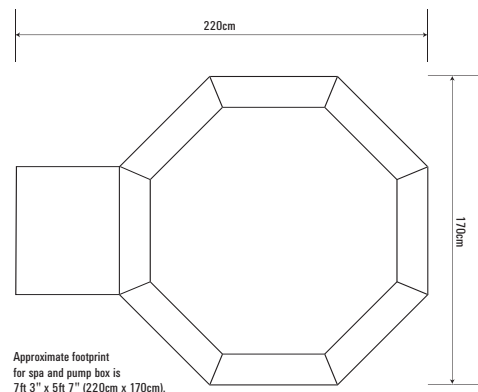

The Garden Spa pump is one of the most advanced systems available. The unit pumps 300 lt/min delivering optimum flow to the jets. It incorporates a built-in 1.3 kW heater with adjustable thermostat. When the spa has reached the desired temperature, not only does the thermostat test the temperature of the spa water from the pump housing, (which

can cool down faster than the inside of the spa itself), it actually draws in a sample of water from the spa to take the real water temperature. It then decides whether to run its heater or not - saving you on running costs! Whisper quiet operation (67dba) ensures it won't spoil your relaxation or disturb your neighbours.

The Garden Spa is constructed from 50 mm (2") wide tongue and grooved timber (which acts as a great insulator). After all machine work is carried out the wood is pressure treated to ensure every part is able to withstand the elements for many years to come. The wall of the spa is easily assembled by slotting together the panels. The top deck surround is made from resin wood timber substitute which is maintenance free and won't fade or peel. The hard wood only requires a light application of garden furniture oil once a year to keep it looking beautiful.

The Garden Spa can be sited inside or out - the choice is yours.
